## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Species A, the first embodiment of the invention (Figures 5A-5E), in the reply filed on 12 June 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. The Examiner notes that Applicant has indicated Claims 1-5, 12-16, 23, 25, 27, and 28 as reading on the elected species. Claims 6-11, 17-22, 24, and 26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12 June 2006.
3. Further consideration has revealed that this application contains claims directed to the following patentably distinct sub-species of elected Species A:
  - Species 1:** wherein the thermal spraying process is an arc wire spraying process;
  - Species 2:** wherein the thermal spraying process is a high velocity oxygen-fuel spraying process;
  - Species 3:** wherein the thermal spraying process is a plasma spraying process;
  - Species 4:** wherein the thermal spraying process is a plasma transferred arc spraying process;
  - Species 5:** wherein the thermal spraying process is a vacuum or low pressure plasma spraying process;

**Species 6:** wherein the thermal spraying process is a low velocity oxygen-fuel spraying process;

**Species 7:** wherein the thermal spraying process is a detonation thermal spraying process;

**Species 8:** wherein the thermal spraying process is a high velocity particle consolidation spraying process;

**Species 9:** wherein the thermal spraying process is a wire spraying process; and

**Species 10:** wherein the thermal spraying process is an ion plating process.

4. The species are independent or distinct because the enumerated thermal spraying processes have independent and/or distinct features and/or modes of operation as disclosed in detail in the Specification (Paragraphs 62-73).

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least elected independent Claim 1 appears to be generic.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

8. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

9. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

10. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
